

THE JALAS® HEAVY DUTY COLLECTION

DESIGNED  
FOR  
EXTREMES.

ejendals ■ jalas®

# OUR VISION: ZERO INJURIES TO HANDS AND FEET.

JALAS® HEAVY DUTY safety shoes have been developed for your most demanding work days. For tough environments and severe conditions. Eight ultra-durable models combine extraordinary safety features and protection with flexible, ergonomic comfort for even your longest workdays.

You can't always control your working environment, but you can equip yourself with the very best protective gear to prevent accidents and injuries.

# METAL-FREE MEETS ARCTIC GRIP.

Simply the best year-round anti-slip, metal-free safety shoes for any work environment.

## **SUPERIOR GRIP WITH VIBRAM ARCTIC GRIP OUTSOLE**

Vibram Arctic Grip outsole prevents falls even on extremely slippery, oily, or icy surfaces. See more on next spread.

## **INNOVATIVE METAL-FREE DESIGN**

Metal-free for fast, hassle-free passage through metal detectors. The shoes are equipped with non-metal protective nail penetration insert in PTC and non-metal protective composite toe-cap.

## **COMFORTABLE ERGONOMIC COMPONENTS**

A PU midsole in combination with multilayer FX2 Supreme insole provides stable cushioning and shock absorption to make the shoe comfortable and prevent injuries to the foot and back. Shock absorbing material on the sides of the shoe supports ankles and protects the upper part of the foot from impact.

## **DURABLE QUALITY**

PU-coated leather upper and PU pronose at the front of the shoe ensure long-lasting wear resistance, water/snow repellence, and easy cleaning.

**Areas of use: Building and construction, heavy duty manufacturing, transportation and environments requiring metal free equipment.**

### JALAS® 1348 HEAVY DUTY

S3 SRC CI HRO HI

- For year-round use
- Soft and breathable polyamide lining
- Metal-free
- Available with BOA® Fit System (JALAS® 1338) in Q1 2020
- The BOA® Fit System includes metal lace but passes metal security at airports

### JALAS® 1358 HEAVY DUTY

S3 HI CI AN HRO SRC

- For year-round use
- Convenient BOA® Fit System. Includes metal lace but passes metal security at airports
- Soft and breathable functional fleece lining

### JALAS® 1368 HEAVY DUTY

S3 HI CI AN HRO SRC

- Winter boot
- Insulating wool and polyester lining for maximum warmth and comfort
- Metal free

### JALAS® FX2 SUPREME INSOLE

1. Textile layer for breathability
2. Merino wool transports moisture and controls temperature
3. Soft EVA material for cushioning and stability
4. Poron® XRD™ for shock absorption

**PORON® XRD™** is used on the sides, ankle and tongue of the shoe to protect the foot from outside impact. The unique material feels remarkably soft until exposed to pressure or impact, at which time it hardens to protect the foot from external injury. Poron® XRD™ also provides superior ankle support. Available on models 1358 and 1368.

# ADVANCED WINTER MODELS.

Two rugged winter models with soft thermo-lining and Vibram Arctic Grip outsole to withstand extreme cold and icy surfaces.

## EXTREME SAFETY

Vibram Arctic Grip anti-slip outsole prevents falls on extremely icy and slippery surfaces and gives extra protection on wet ice. Protective steel nail penetration insert and composite toe-cap protects from injuries.

## ERGONOMIC COMFORT

A winter PU midsole and a five layer winter insole ensures insulation from the cold, and provides soft comfort and advanced shock absorption to prevent long term injuries to feet and back.

## ADVANCED WINTER PROTECTION

Wool + Thinsulate™ double layer lining insulates against cold and wicks away moisture. PU-coated leather upper and PU pronose at front of shoe ensure long lasting wear resistance, water/snow repellence and easy cleaning.

## Vibram Arctic Grip outsole

- Unique gripping traction on icy surfaces with non-metal gripper lugs
- Made of heat- and oil-resistant HNBR rubber
- Draining channels remove oil, water and dirt
- Stabilising arch support system provides secure grip on ladders and adds stability
- ESD / Antistatic

**Areas of use: Work outside in cold climate.**

### JALAS® 1378 HEAVY DUTY

S3 SRC HRO CI

- Snow lock and bellows tongue prevent ice, dirt or snow from entering
- Lacing for snug fit and side zipper for easy foot entry.

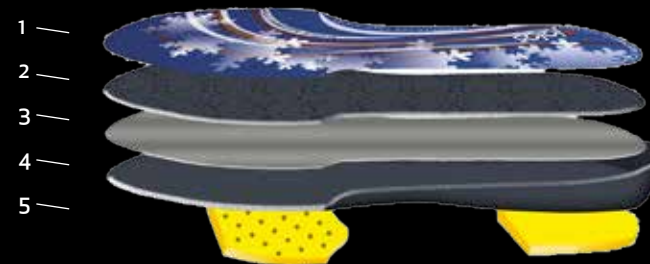

### JALAS® 1388 HEAVY DUTY

S3 SRC HRO CI

- Snow lock-in shaft prevents ice or snow from entering
- Velcro® attachment for fit and ankle support

### JALAS® FX2 WINTER INSOLE

1. Textile layer
2. Merino wool transports moisture and retains warmth
3. Foil layer reflects cold from ground
4. Soft EVA material for cushioning and stability
5. Poron® XRD™ shock absorption that is soft but becomes firm when walking

# ORIGINAL HEAVY DUTY.

Durable workhorses designed for the harshest, most demanding work environments.

## EXTREME SAFETY

JALAS® Balance anti-slip outsole and protective steel nail penetration insert and composite toe-cap protect from slippery surfaces, sharp objects on the ground and falling objects.

## ERGONOMIC COMFORT

A PU midsole and a four layer insole ensures soft comfort, stable cushioning and advanced shock absorption to prevent long term injuries to the feet and back.

## DURABLE QUALITY

PU-coated leather upper, PU Pronose at front of shoe and bellows tongue ensure long-lasting wear resistance, water/dirt repellence, and easy cleaning.

JALAS® Balance outsole for safe and secure grip

- Made of rugged and anti-slip Nitrile rubber
- Draining channels remove oil, water and dirt and provide flexibility
- Stabilising arch support system provides secure grip on ladders and adds stability
- Heat and oil resistant
- ESD / Antistatic
- Heat and oil resistant
- ESD / Antistatic

**Areas of use: Building and construction, heavy duty manufacturing. Both outdoors and indoors.**

### JALAS® 1258 HEAVY DUTY

S3 SRC CI HRO HI

- Heat resistant upper for heat and welding environments
- Year-round use
- Velcro® closure

### JALAS® 1268 HEAVY DUTY

S3 SRC CI HRO HI

- BOA® Fit System for convenience and fit
- Heel support for added support and protection

### JALAS® 1278 HEAVY DUTY

S3 SRC CI HRO HI

- BOA® Fit System for convenience and fit
- Memory foam padding. A soft protective material that molds to the shape of your heel
- Unique ankle support system developed to protect and support ankles in rough work conditions
- work conditions

### JALAS® FX2 SUPREME INSOLE

1. Textile layer for breathability
2. Merino wool transports moisture and controls temperature
3. Soft EVA material for cushioning and stability
4. Poron® XRD™ for shock absorption
